Preface	ii
Foreword	iii
Contents	iv
Contributors	vii
Abbreviations and Units	viii
Chapter 1 Physiology of Respiration	1
1.1 Introduction	
1.2 Lung Mechanics – The Work of Breathing	
1.3 Lung Mechanics – Surface Tension	
1.4 Lung Mechanics – The Flow-Volume-Time Relationship	
1.5 Gas Diffusion – Ventilation-Perfusion Relationships	
1.6 Gas Diffusion - Oxygen and the Cell	
1.7 Control of Respiration - Rhythmicity of Breathing	
1.8 Control of Respiration - Chemoreceptor Control	
1.9 Control of Respiration - Disorders of Ventilatory Control	
1.10 Control of Respiration - Influence of Higher Centres on Ventilation	
1.11 Control of Respiration - Regulation of Airway Smooth Muscle Tone	
1.12 Control of Respiration - Pharmacological Control of the Airways	
1.13 Breathlessness	
1.14 Integrated Responses – Cardio-Respiratory Responses to Exercise	
1.15 References	
1.16 Further Reading	
Chapter 2 Bronchodilator Response	88
2.1 Introduction	
2.2 Pharmacodynamics	
2.3 Adrenergic Agents	
2.4 Antimuscarinic drugs	
2.5 Corticosteroids	
2.6 Other Respiratory Therapies	
2.7 Clinical Utility	
2.8 References	
2.9 Further Reading	
Chapter 3 Blood Gases	106
3.1 Introduction	
3.2 Nomenclature	
3.3 Invasive measurement	
3.4 Health and safety considerations	
3.5 Non-Invasive measurement	
3.6 Measured parameters	
3.7 Interpretation of results	
3.8 Blood Gas Analyser	
3.9 References	
Chapter 4 Pulse Oximetry	130
4.1 Introduction	
4.2 Definitions	
4.3 Measurement Principle	
4.4 Equipment Type	
4.5 Calibration, Quality Control and Accuracy	
4.6 Limitations of Pulse Oximetry	
4.7 Personnel	
4.8 Infection Control	
4.9 Test Procedure	
4.10 Reporting the Results	
4.11 References	

	Page
Chapter 5 Overnight Oximetry	141
5.1 Introduction	
5.2 Clinical Limitations of Pulse Oximetry	
5.3 Analysis of Desaturations	
5.4 Display of Results	
5.5 Clinical Uses of Pulse Oximetry	
5.6 Performing Overnight Oximetry	
5.7 Sleep Physiology	
5.8 Overnight Pulse Oximetry for Sleep-Disordered Breathing in Adults	
5.9 Interpretation	
5.10 Sleep Disordered Breathing	
5.11 Chronic Obstructive Pulmonary Disease	
5.12 Thoracic Restrictive Diseases and Neuromuscular Disorders	
5.13 Central Sleep Apnoea and Cheyne Stokes Respiration	
5.14 Nocturnal Asthma	
5.15 Summary	
5.16 References	
Chapter 6 Field Walk Tests	174
6.1 Introduction	
6.2 Background	
6.3 Indications	
6.4 Patient Safety	
6.5 Patient History and Preparation	
6.6 Protocol for 6 Minute Walk Test	
6.7 Ambulatory Oxygen Test	
6.8 Performance of the Incremental Shuttle Walk Test (ISWT)	
6.9 The Endurance Shuttle Walk Test (ESWT)	
6.10 Step Test	
6.11 Usefulness and Interpretation of Field Exercise Tests	
6.12 References	
Chapter 7 Bronchial Challenge Testing	191
7.1 Introduction	
7.2 Definition of Terms and Units: Principal of Measurement	
7.3 Indications for Challenge Testing	
7.4 Pharmacological Challenge	
7.5 Background Physiology	
7.6 Background Pathophysiology	
7.7 Background Pharmacology	
7.8 Equipment and choice of Agent	
7.9 Test Procedure	
7.10 Procedure	
7.11 Calculation of Results	
7.12 Interpretation	
7.13 Reproducibility	
7.14 Troubleshooting	
7.15 Controversial Issues	
7.16 Case Study	
7.17 Physical Challenge	
7.18 References	

	Page
Chapter 8 Respiratory Muscle Function	235
8.1 Introduction	
8.2 Anatomy of the Respiratory Muscles	
8.3 Control of Ventilation	
8.4 The Respiratory Cycle	
8.5 Load/capacity Balance	
8.6 Respiratory Muscle Fatigue	
8.7 Assessment of Respiratory Muscle Function	
8.8 Causes of Respiratory Muscle Weakness	
8.9 Respiratory Muscle Training	
8.10 Summary	
8.11 References	
8.12 Further Reading	
Chapter 9 Whole Body Plethysmography	261
9.1 Introduction	
9.2 Definitions and Normal Ranges	
9.3 Measurements Made by Whole Body Plethysmography	
9.4 Plethysmography Specification	
9.5 Measurement of Airway Resistance, Conductance and Specific Conductance using a Constant-Volume Plethysmograph	
9.6 Measurement of Compression-free Flow Volume Curve using a Constant-Pressure Plethysmograph	
9.7 Significance and Pathophysiology	
9.8 Calibration and Quality Control	
9.9 References and Further Reading	
Appendix	
Chapter 10 Advance Paediatric (under 5) Pulmonary Function Testing	276
10.1 Background	
10.2 Introduction to Infant Lung Function Testing	
10.3 Assessment of Pulmonary Function in Infants	
10.4 Further Reading	
Index	306
