

Association for Respiratory  
Technology & Physiology  
Breathing Inspiration and Quality into Respiratory Healthcare

# Interested in Spirometry?

The Association for Respiratory Technology & Physiology (ARTP) has developed a range of spirometry courses for all levels of practitioner. These courses are designed to cater for all practitioners who want to perform and/ or interpret **QUALITY** spirometry.

## ARTP Full Certificate in Spirometry

- **Certification of competency in the performance and interpretation of quality spirometry**
- Certificate registration costs: £150 (course costs additional- see website for local centres)
- Spirometry Handbook costs: £30
- The course typically requires 2-3 days of classroom based lectures
- Those wishing to register for the certificate in competency then go on to complete a portfolio and undertake a formal assessment

## ARTP Foundation Certificate in Spirometry

- **Certification of competency in the performance of quality spirometry**
- Certificate registration costs: £150 (course costs additional- see website for local centres)
- Spirometry Handbook costs: £30
- The course is 1 day and covers all practical aspects of the performance of spirometry (interpretation NOT included)
- Those wishing to register for the certificate in competency then go on to complete a portfolio and undertake a formal assessment

## e-Spirometry – learn spirometry online!

- **'Spirometry in Practice'** is the online version of the ARTP Spirometry Handbook.
- This online course looks at the anatomy and physiology of lung disease, and the theory, performance and interpretation of spirometry including equipment usage and maintenance.
- This course will provide you with the knowledge required to register for the ARTP/BTS Full or Foundation certificate in Spirometry (dependent on modules completed)
- This course is ideal for those who find it difficult to take time away from their normal duties to attend a training centre
- Course costs: £275
